

Project Executable Files

Date	5 July 2026
Team ID	xxxxxx
Project Name	OptiCrop – Smart Agricultural Production Engine
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example similar)	NA
6	Deployed application URL (if hosted)	NA

7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```

OptiCrop/
├── dataset/
│   └── Crop_recommendation.csv
├── model/
│   └── crop_model.pkl
├── static/
│   ├── style.css
│   └── images/
├── templates/
│   └── index.html
├── app.py
├── requirements.txt
├── README.md
└── test_results/
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	NA
Login Credentials	Not Required

Platform / Hosting Provider	Local Flask Server
Repository Link	https://github.com/hema-chitra/OPTICROP-SMART-AGRICULTURAL-PRODUCTION-OPTIMIZATION-ENGINE-ALML
Demo Video Link	https://1drv.ms/v/c/b5b7b3941b5c9777/IQCUwxtCo_e5TpUppJktNL_kAfaK6pASsG4tThU8hsuYdpQ?e=vvul00

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

- ❑ Download or clone the project repository.
- ❑ Open the project folder in Visual Studio Code.
- ❑ Install Python 3.10 or later. ❑ Install required packages using:

`pip install -r requirements.txt` Run the application:

`python app.py`

Open the browser and visit:

`http://127.0.0.1:5000`

- ❑ Enter the required soil and environmental values.
- ❑ Click **Predict Crop** to view the recommended crop.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Works only with the trained dataset	Update and retrain the model with new data
2	Local deployment only	Can be deployed on Render or PythonAnywhere
3	Internet-based weather integration is not available	Can be added in future versions
